~ A helpful list of trait packages to make it easier to understand seed guides, sales materials, and bag tags ~

Updated design for 2024

In the past, all Bt trait packages have been in the trait table. But over the years, some industry colleagues commented that leaving older products in the table was confusing if growers assumed they could still be purchased. However, information on older packages is needed to interpret planting or research records from previous years. Also, companies still refer to original traits (like Herculex I or YieldGard) on field signs, web sites, and seed guides, because single traits are components of newer multi-trait hybrids.

To finally address this concern, the 2024 table is split. I looked at 2024 seed guides from the major seed companies plus many smaller regional providers. If I found a trait package offered in at least one hybrid, from any company, it stayed on the current trait table (page 2). Trait packages which were not found as standalone hybrids were moved into a new 'phased out' table (below) for historical reference. Hopefully, this split addresses any confusion in availability. This is a work in progress; if you see an error in the 'phased out' table, send me some evidence and I'll move that package back into the current table.

New Bt names: Names of pesticidal proteins that come from bacteria were recently updated. Most Bts in the trait table are unchanged, but **Cry34/35Ab1** is now **Gpp34Ab1/Tpp35Ab1**. I kept the old name in the Bt Trait Table for now, since many seed guides and extension materials haven't caught up to the change. But related materials on the Texas A&M website are up to date.

ABBREVIATIONS in the TRAIT TABLE

Insect Pest Targets

- BCW black cutworm
- CEW corn earworm
- CRW corn rootworm
- ECB European corn borer
- FAW fall armyworm
- NCR northern corn rootworm
- SB stalk borer
- SCB sugarcane borer
- SWCB southwestern corn borer
- TAW true armyworm
- WBC western bean cutworm
- WCR western corn rootworm

Herbicide Tolerance

- GLY glyphosate / Roundup-Ready
- LL glufosinate / Liberty Link
- LL? check the bag tag for LL status
- Enlist 2,4-D & fops / Enlist trait

Refuge

Unless specified as RIB (Refuge In Bag), all other percentages assume separate, structured refuge areas planted in strips, blocks, borders, or whole fields
