

## **Eclipse Trio Treatment**

Designed to provide early season control of major diseases and insects while providing nitrogen fixing bacteria for fixing nitrogen.

## **Active Ingredients**

**Ipconazole** is a systemic broad-spectrum fungicide and seed dressing specifically for protection against soilborne and seedborne diseases. For protection against seed rot, damping off and seedling blight including *Fusarium* (seed and soil borne), *Rhizoctonia solani*, and seed borne *Diaporthe (Phomopsis)*. Also protects against general seed rots caused by saprophytic organisms such as *Penicillium*, and *Aspergillus*, and protects against seed-borne *Botrytis* and *Sclerotinia*.

**Metalaxyl** is a systemic broad-spectrum fungicide and seed dressing specifically for protection against soilborne and seedborne diseases. Metalaxyl provides control of *Pythium* and seedling blight phase of *Phytophthora* in soybeans.

**Thiabendazole** provides excellent control of pod and stem blight (*Phomopsis*) and *Fusarium*.

**Imidacloprid** is a systemic seed treatment that has efficacy against seed corn maggots, early season soybean aphids and early season bean leaf beetles.

**N-Force**. Nitrogen fixing bacteria. Colonizes roots of plants to provide the plant with Nitrogen from the air. Has a 240-day shelf life after application.

## Saltro® Treatment

Designed to provide protection against Sudden Death Syndrome and nematodes. It also provides early season control of major diseases while providing nitrogen fixing bacteria for fixing nitrogen.

## **Active Ingredients**

**Saltro** is a systemic seed treatment for use on Soybean for the protection against damage caused by early season plant pathogenic nematodes. As a soybean seed treatment provides protection from seedling infections by *Fusarium virguliforme*, the causal agent of Sudden Death Syndrome.

**Ipconazole** is a systemic broad-spectrum fungicide and seed dressing specifically for protection against soilborne and seedborne diseases. For protection against seed rot, damping off and seedling blight including *Fusarium* (seed and soil borne), *Rhizoctonia solani*, and seed borne *Diaporthe (Phomopsis)*. Also protects against general seed rots caused by saprophytic organisms such as *Penicillium*, and *Aspergillus*, and protects against seed-borne *Botrytis* and *Sclerotinia*.

**Metalaxyl** is a systemic broad-spectrum fungicide and seed dressing specifically for protection against soilborne and seedborne diseases. Metalaxyl provides control of *Pythium* and seedling blight phase of *Phytophthora* in soybeans.

**Thiabendazole** provides excellent control of pod and stem blight (*Phomopsis*) and *Fusarium*.

**Imidacloprid** is a systemic seed treatment that has efficacy against seed corn maggots, early season soybean aphids and early season bean leaf beetles.

**N-Force**. Nitrogen fixing bacteria. Colonizes roots of plants to provide the plant with Nitrogen from the air. Has a 240-day shelf life after application.
