

SmartStax® PRO

With RNAi TECHNOLOGY

SMARTSTAX® PRO WITH RNAI TECHNOLOGY IS THE NEXT GENERATION OF CORN ROOTWORM CONTROL

The best way to minimize the risk of devastating crop damage is to help maximize control of corn rootworm below ground while protecting against above-ground pests. SmartStax® PRO with RNAi Technology will provide three modes of action against corn rootworm for the strongest biotech defense* available in 2022.

WHAT SETS SMARTSTAX PRO TECHNOLOGY APART

- Will be the first product with **THREE** modes of action for corn rootworm control
- Will combine the proven benefits of **SmartStax® Technology** with an additional, RNAi-based mode of action
- SmartStax PRO Technology will provide broad-spectrum control of **above- and below-ground pests as well as tolerance to glyphosate and glufosinate herbicides**

QUANTIFYING THE DAMAGE

Root damage is primarily caused by corn rootworm larval feeding. Every root node nibbled by larvae can result in a yield loss of approximately 15%.¹ In addition, root lodging can impede harvesting, further reducing grain yield by 15%–34%.²

HEALTHY ROOT

DAMAGED ROOT

15%-34% yield loss from root damage by corn rootworm

EXCEPTIONAL ABOVE- AND BELOW-GROUND PROTECTION

Multiple modes of action give corn plants the protection they need against major pests that can inflict serious crop damage.

CORN ROOTWORM (NORTHERN & WESTERN)

EUROPEAN CORN BORER

SOUTHWESTERN CORN BORER

CORN EARWORM

FALL ARMYWORM

BLACK CUTWORM

*34 2021 Bayer Trials in the corn belt (KS, CO, NE, IA, IL, IN, SD, OH, MN) in medium to very high CRW pressure environments (as shown by a Node Injury Score of 0.76-3.0 on a 0-3 scale in the non-CRW treated check) vs SmartStax® RIB Complete® Corn Blend, Agrisure Duracade® E-Z Refuge®, Qrome® and Optimum® AcreMax® Xtreme products in the 95-115 RM range with comparable trait packages

¹Corteva Agriscience® claims suppression of corn earworm with Herculex® Technology.

²Syngenta claims suppression of corn earworm with Bt11.

³Cry1A.105 and Cry2Ab2 from B.t. controls or suppresses corn earworm.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

SmartStax® PRO RIB Complete® corn blend will be commercially available for the 2022 growing season.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. Herculex® is a registered trademark of Dow AgroSciences LLC. LibertyLink® and the Water Droplet Design® is a trademark of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association.
